

AHMAD ASIF ARIFEEN

FRONTEND DEVELOPER

ABOUT ME

I'm Ahmad Asif Arifeen, a driven Computer Science and Engineering graduate from Independent University with a passion for crafting seamless digital experiences. My expertise lies in web development, with proficiency in HTML, CSS, and JavaScript. Additionally, I have hands-on experience in app development, having created projects using Flutter, as well as working with Java and C++.

PROJECTS

Cross Platform Web Based License Plate Recognition System

It is designed to recognize Bangla license plates and verify driver registration and violation history. This system stores driver license plate data in a database, ensuring efficient monitoring and enforcement across various platforms. <https://github.com/shibriat/senior-project>

Revenue and Resource Monitoring System

It is a comprehensive platform that displays class schedules for specific times throughout the week at the university. Additionally, it tracks and presents the annual revenue generated by the university, facilitating efficient resource management and financial oversight. <https://github.com/ahmadarifeen/RMS>

Tip Calculator

It is a user-friendly app developed using Flutter on Android Studio, designed to quickly calculate tips for various service amounts. Its intuitive interface ensures a seamless experience for users, making it easy to determine the appropriate tip and total bill. https://github.com/ahmadarifeen/Tip_Calculator
